## Preamble

This publication of the Site Allocations Development Plan Document (DPD) Health Impact Assessment (HIA) 'Screening Checklist' has been completed by the South Ribble Borough Council Forward Planning Team.

The Council also works in partnership with GPs through its health directorate to ensure they are aware of the potential locations of future growth and how funding derived from such growth can support the development of extra facilities, such as health centres.

## Methodology

This health impact assessment has measured its Screening Checklist against key layers/bands illustrated within the 'model of health' shown below.

Source: Barton and Grant (2006) based on a public health concept by Whitehead and Dahlgren (1991)

The checklist is intended to embed public health across the South Ribble Site Allocations Development Plan Document (DPD) Publication Version (39 policies) and raise awareness amongst strategic partners and deliverers. The screening checklist has been used to systematically assess health and wellbeing related factors. It endeavours to illustrate characteristics perceived to have the greatest impact on maximising health and wellbeing gains across South Ribble.

This document forms part of a continual review process completed in parallel with the developing Site Allocation Development Plan Document (DPD), linking to similar supplementary submissions notably the Equality Impact Assessment and Sustainability Appraisal.

The Screening Checklists symbolise ongoing consideration which is given to health issues within South Ribble Borough Council's planning process. This is particularly in relation to Site Allocations DPD Policy H1 (and Core Strategy Policy 23).

Whilst the checklists provides a 'road map' for discussions surrounding the health and wellbeing agenda, the mantle for achieving improved outcomes must be shouldered by elected members, senior managers and officers across all agencies and partners in order to realise the best possible strategic gains for the benefit of the borough.

The Screening checklists represent an accumulation of continual HIA review conducted in parallel with the evolving South Ribble Site Allocations Publication Version Development Plan Document, notably its 39 policies. Each policy has been individually analysed to assess its potential impact on the health and wellbeing of the South Ribble population using a systematic and focused matrix. This assessment has not included any impact on equality as this is covered in the Equality Impact Assessment carried out separately.

The following groups of the population have been taken into consideration when carrying out this assessment.

- Minority ethnic people (including Gypsy/travellers, refugees and asylum seekers)
- Women and men
- People in religious/faith groups
- People with disabilities
- Older people, children and young people
- Lesbian, gay, bisexual and transgender people
- People of low income
- People with mental health problems
- Homeless people
- People involved in criminal justice system
- Staff
- Families
- People living alone
- Students
- Settled community

The screenings have been undertaken not only to inform the evolving South Ribble Site Allocations Publication Version Development Plan Document's construction, embedding health and wellbeing as a golden thread throughout but fundamentally to influence future delivery and to create health and wellbeing 'thinking' prior to and throughout implementation phases amongst public and private sector partners.

Ultimately this document and the policy screenings contained within, should be viewed as a key tool and actively used to aid and achieve positive outcomes from delivery rather than it becoming a closed document once the South Ribble Site Allocations Publication Version DPD is adopted.

The South Ribble Forward Planning Team has strived to embed health and wellbeing within the Site Allocations DPD and encouragingly absorbed and acted upon the screenings submitted. Ultimately the South Ribble Forward Planning Team perceives that all policies will soundly facilitate the achievement of positive health and wellbeing outcomes and will be strengthened further by the recommendations and draft monitoring processes. Of particular note is Chapter H – Promoting Health, Wellbeing, Education and Other Community Services and Facilities. This chapter includes Policy H1 – Protection of Health, Education and Other Community Services and Facilities.

## Summary

### Key Policies

The policies contained within the Site Allocations DPD in relation to health will support the delivery of health facilities. The key policies in relation to health are:

- Policy A1 – Developer Contributions, helping to provide new health facilities in line with growth
- Policy B2 – Village Development
- Policy G1 – Green Belts
- Policy G10 – Green Infrastructure Provision in Residential Developments
- Policy G11 – Playing Pitch Protection and New Provision
- Policy G12 – Green Corridors
- Policy G13 – Trees, Woodlands and Developments
- Policy G4 – Protected Open Land
- Policy G5 – Areas of Separation
- Policy G6 – Central Park
- Policy G7 – Green Infrastructure – Existing Provision
- Policy G8 – Green Infrastructure and Networks – Future Provision
- Policy G9 – Worden Park
- Policy H1 – Protection of Health, Education and Other Community Services & Facilities

### Key Recommendations

To help mitigate any potential negative effects from the implementation of the Site Allocations DPD, the following key recommendations are highlighted:

- Align the HIA alongside the other LDF documents/work to ensure healthy urban and rural planning is reflected throughout.
- Consider innovative ways of using CIL/Section 106 monies or tariffs to maximise health gains.
- Co-habitation of services must become a reality in order to achieve operational efficiencies whilst strengthening access to health and wellbeing services, eg leisure and community services housed alongside GP surgeries and health centre facilities 'mini Minerva Centres'. This has strong links with Policy A1 – Developer Contributions.
- Continue to build capacity of health facilities across the borough through partnership working.
- The completion of health impact assessments at a project level/planning application stage should be encouraged for larger sites.

### Monitoring and Review Arrangements

The following list suggests methods of future monitoring of the HIA process and to ensure that the health objectives within the Site Allocations DPD are being delivered.

- Through the Annual Monitoring Report process in terms of directly related health policy indicators, such as:
  - Reduction in percentage of children recorded as being obese in reception year
  - Number of health facilities within the borough.
  - Level of NO<sub>x</sub> at the AQMA points to be less than 40µg/m<sup>3</sup>.
- When a review of the Site Allocations DPD takes place, it would be appropriate to carry out a health impact assessment, to assess any policy changes and their potential effects.

# Screening Checklist

## Policy A1 – Developer Contributions

<p>(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)</p>	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles and wellbeing? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills</p>	<ul style="list-style-type: none"> <li>• Having access to the right types of local facilities is an important part of community infrastructure. Colocation is a good way to achieve this.</li> <li>• Green travel (promoting healthy lifestyles) should be considered of equal importance to that of motor travel provision/access.</li> <li>• Links between open space and community wellbeing need to be borne in mind. Exercise and physical activity facilities should be designed to reflect the population/demographics need. Physical activity is effective in the treatment of mental illness.</li> </ul>
<p>What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty</p>	<ul style="list-style-type: none"> <li>• New developments must enhance the employment and educational prospects of local residents either through increased local provision or alternatively accessed via effective public or green transport.</li> </ul>
<p>What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease</p>	<ul style="list-style-type: none"> <li>• New housing should be affordable, ie for families on restricted budgets and/or first time buyers.</li> <li>• Both on and off site infrastructure plans must account for the impact on existing and proposed residents/communities, taking measures to mitigate potentially negative impacts on living conditions, working conditions, pollution and accidental injuries/public safety.</li> <li>• The promotion of healthy town centres is recommended, ie an emphasis for open space – recreation/exercise, good pedestrian/cycle routes, healthy/organic shops etc.</li> </ul>
<p>How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure</p>	<ul style="list-style-type: none"> <li>• Consideration must be given to the ability of existing green corridor infrastructures to cope with increased demand and whether they require additional investment/expansion.</li> <li>• Growth must be considered in line with the provision of health care, social services, education and leisure etc, ie are there adequate local services and can these cope with the increased pressure/demand arising from population increases? It should be a prerequisite that locality growth takes account of such future demands on local services. How can the public/private sector work/plan better together regarding future development and maintenance of services to minimise the impact on the local population? Partnership working is key. Greater investment and considered development into chosen localities will, in turn, bring</li> </ul>

	<p>associated health benefits if aligned to the ethos of local provision.</p> <ul style="list-style-type: none"> <li>• Growth must be considered in parallel with travel infrastructure plans, ie do the existing road and/or motorway networks have the capacity to deal with increased demand arising from the development of identified sites to ensure access to health care providers and other support services. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> <li>• Tariffs levied against new businesses/developments could potentially be invested in services (shown opposite) which improve quality of life for local people.</li> </ul>
--	---

## Policy A2 – Cross Borough Link Road

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills</p>	
<p>What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty</p>	<ul style="list-style-type: none"> <li>• Opportunities for commuting are potentially positive for employment/socioeconomic status of individual residents/households, but reduces local economic stability locally.</li> </ul>
<p>What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease</p>	
<p>How will the proposal impact on access to and quality of services? Health care Transport</p>	<ul style="list-style-type: none"> <li>• Ensuring the correct infrastructure is in place, ie roads/public transport, is key to ensure access to health care providers and other support services. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health</li> </ul>

Social services Housing services Education Leisure	Observatories.
---	----------------

### Policy A3 – The completion of the Penwortham Bypass

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills	
What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	<ul style="list-style-type: none"> <li>Opportunities for commuting are potentially positive for employment/socioeconomic status of individual residents/households, but reduces local economic stability locally.</li> </ul>
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease	
How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure	<ul style="list-style-type: none"> <li>Ensuring the correct infrastructure is in place, ie roads/public transport, is key to ensure access to health care providers and other support services. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> </ul>

## Policy B1 – Existing Built-Up Areas

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills	
What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	<ul style="list-style-type: none"> <li>Changing the character and appearance of an area potentially contributes to stress levels. Maintaining the character and appearance can therefore help to reduce this.</li> </ul>
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease	
How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure	

## Policy B2 – Village Development

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour	<ul style="list-style-type: none"> <li>Availability, affordability, location, standard and density are key social/health determinant themes (hypothermia, respiratory illness, cardiovascular problems, increased risk of accidents/falls, impaired mental/cognitive function, isolation, depression) when considering healthy lifestyles. As such it is recommended that housing delivery plans should reflect the above factors.</li> </ul>

Education and lifelong learning or skills	
What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	<ul style="list-style-type: none"> <li>Careful consideration must be given to housing density as this can potentially have an impact on stress.</li> </ul>
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease	<ul style="list-style-type: none"> <li>Increased targeted investment will have positive impacts on living conditions through properly designed locations. However, rising population numbers can lead to increased pressure on infrastructure facilities.</li> <li>Housing density is considered a key strand impacting on the physical environment, notably living conditions.</li> <li>Positive impacts will result from quality/affordable housing as improving living conditions improves mental/physical health which promotes improved chances of employment, reduces stress and should decrease child poverty as families increase their income.</li> </ul>
How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure	<ul style="list-style-type: none"> <li>Greater investment and considered development into chosen localities will, in turn, bring associated health benefits if aligned to the ethos of local provision.</li> </ul>

## Policy B3 – Commercial and Employment Sites (South Rings Business Park)

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills	<ul style="list-style-type: none"> <li>Businesses operating in the borough should be encouraged to adopt good employment practice and commit, for example, to Health Works Awards Gold standard to improve their employees' overall physical and mental health and wellbeing. This ultimately contributes to lower sickness absence, greater productivity and an improved sense of personal health and wellbeing.</li> <li>Green travel (promoting healthy lifestyles) should be considered of equal importance to that of motor travel provision/access.</li> <li>The number of unhealthy retail outlets, such as fast food outlets and tanning salons, should be limited.</li> </ul>
What impact will the proposal have on the social environment? Social status	<ul style="list-style-type: none"> <li>Health impacts from a local community perspective, hence future economic growth, employment premises and site delivery plans, must emphasise the necessity of local employment for local people given the obvious links to all social environment</li> </ul>

<p>Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty</p>	<p>factors (shown opposite). In the interest of sustainable development, as well economic, environmental, and social wellbeing of the Borough residents it is important that greater employment opportunities are created or facilitated within the Borough, particularly for residents of the borough.</p> <ul style="list-style-type: none"> <li>• Wherever possible, the retail offer should reflect current and predicted population demographics, both in terms of the offer and accessibility to ensure relevance and sustainability.</li> </ul>
<p>What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease</p>	<ul style="list-style-type: none"> <li>• A health impact assessment could be completed for each growth and employment site to mitigate potentially negative health impacts and identify improvement opportunities.</li> <li>• A vibrant economy may translate into better living conditions.</li> <li>• There is a need to introduce appropriate, sustainable and healthy retail and leisure outlets at the delivery stage.</li> </ul>
<p>How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure</p>	<ul style="list-style-type: none"> <li>• Growth must be considered in parallel with travel infrastructure plans, ie do the existing road and/or motorway networks have the capacity to deal with increased demand arising from the development of identified sites.</li> <li>• The council must engage with utility companies regarding future growth and demands placed on services. How can the public/private sector work/plan better together regarding future development and maintenance of services to minimise the impact on the local population? Partnership working is key.</li> <li>• Tariffs levied against new businesses/developments could potentially be invested in services (shown opposite) which improve quality of life for local people.</li> </ul>

## Policy B4 – Commercial and Employment Sites (Land at Cuerden Way, Bamber Bridge)

<p>(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)</p>	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills</p>	<ul style="list-style-type: none"> <li>• Businesses operating in the borough should be encouraged to adopt good employment practice and commit, for example, to Health Works Awards Gold standard to improve their employees' overall physical and mental health and wellbeing. This ultimately contributes to lower sickness absence, greater productivity and an improved sense of personal health and wellbeing.</li> <li>• Green travel (promoting healthy lifestyles) should be considered of equal importance to that of motor travel provision/access.</li> <li>• The number of unhealthy retail outlets, such as fast food outlets and tanning salons, should be limited.</li> </ul>
<p>What impact will the proposal have on the social environment?</p>	<ul style="list-style-type: none"> <li>• Health impacts from a local community perspective, hence future economic growth, employment premises and site delivery plans, must emphasise the necessity of local employment for</li> </ul>

<p>Social status  Employment (paid or unpaid) and worklessness  Social/family support  Stress  Income and child poverty</p>	<p>local people given the obvious links to all social environment factors (shown opposite).</p> <ul style="list-style-type: none"> <li>• Wherever possible, the retail offer should reflect current and predicted population demographics, both in terms of the offer and accessibility to ensure relevance and sustainability.</li> </ul>
<p>What impact will the proposal have on the physical environment?  Living conditions  Working conditions  Pollution or climate change  Accidental injuries or public safety  Transmission of infectious disease</p>	<ul style="list-style-type: none"> <li>• Both on and off site infrastructure plans must account for the impact on existing and proposed residents/communities, taking measures to mitigate potentially negative impacts on living conditions, working conditions, pollution and accidental injuries/public safety. New infrastructure must take account of the risk of flash flooding and provide clean water to new developments, whether residential or commercial, to ensure we avoid problems such as pollution or infectious disease.</li> <li>• Plans for increased economic growth and employment should include measures to reduce accidental injuries at work.</li> <li>• A health impact assessment could be completed for each growth and employment site to mitigate potentially negative health impacts and identify improvement opportunities.</li> <li>• A vibrant economy may translate into better living conditions.</li> <li>• There is a need to introduce appropriate, sustainable and healthy retail and leisure outlets at the delivery stage.</li> </ul>
<p>How will the proposal impact on access to and quality of services?  Health care  Transport  Social services  Housing services  Education  Leisure</p>	<ul style="list-style-type: none"> <li>• Growth must be considered in parallel with travel infrastructure plans, ie do the existing road and/or motorway networks have the capacity to deal with increased demand arising from the development of identified sites.</li> <li>• The council must engage with utility companies regarding future growth and demands placed on services. How can the public/private sector work/plan better together regarding future development and maintenance of services to minimise the impact on the local population? Partnership working is key.</li> <li>• Tariffs levied against new businesses/developments could potentially be invested in services (shown opposite) which improve quality of life for local people.</li> <li>• A vibrant economy could translate into greater demand on quality of life services and suitable provision must be made through the delivery of Policy A1/partnership working.</li> </ul>

## Policy B5 – Commercial and Leisure Site (Capitol Centre)

<p>(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)</p>	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles?  Diet and nutrition  Exercise and physical activity  Substance use: tobacco, alcohol or drugs  Risk taking behaviour  Education and lifelong learning or skills</p>	
<p>What impact will the proposal have on the social environment?</p>	<ul style="list-style-type: none"> <li>• Exercise and physical activity facilities should be designed to reflect the population/demographics need.</li> </ul>

Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	Physical activity is effective in the treatment of mental illness.
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease	
How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure	<ul style="list-style-type: none"> <li>A vibrant economy could translate into greater demand on quality of life services and suitable provision must be made through the delivery of Policy A1/partnership working.</li> </ul>

## Policy B6 – Design Criteria for New Development

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills	<ul style="list-style-type: none"> <li>Community consultation should consider the impact that new buildings will have on the lifestyle factors listed opposite.</li> <li>Families living in safer, cleaner housing of a certain/higher standard will be less vulnerable to illness, especially the older and younger population.</li> </ul>
What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	<ul style="list-style-type: none"> <li>Contractors should be encouraged to use locally sources materials, suppliers and workers to construct their projects.</li> </ul>
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety	<ul style="list-style-type: none"> <li>The policy aspirations are positive and would lead towards positive health outcomes.</li> </ul>

Transmission of infectious disease	
How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure	<ul style="list-style-type: none"> <li>• Ensuring the correct infrastructure is in place, ie roads/public transport, is key to ensure access to health care providers and other support services. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> <li>• If quality of design is of a good standard, communities are attracted to them. A big issue for the health sector is issues around mental health and the link to feeling safe in neighbourhoods and the impact on being able to access services such as health care centres, schools, etc.</li> </ul>

## Policy C1 – Pickering’s Farm, Penwortham

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?
What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills	<ul style="list-style-type: none"> <li>• Having access to the right types of local facilities is an important part of community infrastructure. Colocation is a good way to achieve this. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> <li>• Availability, affordability, variety, location, standard and density are key social/health determinant themes when considering healthy lifestyles. As such it is recommended that housing related policies/delivery plans should reflect the above factors.</li> </ul>
What impact will the proposal have on the social environment? Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty	<ul style="list-style-type: none"> <li>• Careful consideration must be given to housing density as this can potentially have an impact on stress.</li> <li>• New developments must enhance the employment and educational prospects of local residents either through increased local provision or alternatively accessed via effective public or green transport.</li> </ul>
What impact will the proposal have on the physical environment? Living conditions Working conditions Pollution or climate change Accidental injuries or public safety Transmission of infectious disease	<ul style="list-style-type: none"> <li>• New housing should be affordable, ie for families on restricted budgets and/or first time buyers. Positive impacts will result from quality/affordable housing as improving living conditions improves mental/physical health which promotes improved chances of employment, reduces stress and should decrease child poverty as families increase their income.</li> <li>• Increased targeted investment will have positive impacts on living conditions through properly designed locations. However, rising population numbers can lead to increased pressure on infrastructure facilities.</li> </ul>

	<ul style="list-style-type: none"> <li>• Housing density is considered a key strand impacting on the physical environment, notably living conditions.</li> <li>• Both on and off site infrastructure plans must account for the impact on existing and proposed residents/communities, taking measures to mitigate potentially negative impacts on living conditions, working conditions, pollution and accidental injuries/public safety. New infrastructure must take account of the risk of flash flooding and provide clean water to new developments, whether residential or commercial, to ensure we avoid problems such as pollution or infectious disease.</li> </ul>
<p>How will the proposal impact on access to and quality of services?</p> <p>Health care Transport Social services Housing services Education Leisure</p>	<ul style="list-style-type: none"> <li>• Growth must be considered in line with the provision of health care, social services, education and leisure etc, ie are there adequate local services and can these cope with the increased pressure/demand arising from population increases? It should be a prerequisite that locality growth takes account of such future demands on local services.</li> <li>• Greater investment and considered development into chosen localities will, in turn, bring associated health benefits if aligned to the ethos of local provision.</li> <li>• Consideration must be given to the ability of existing green corridor infrastructures to cope with increased demand and whether they require additional investment/expansion.</li> </ul>

## Policy C2 – Moss Side Test Track, Leyland

(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles?</p> <p>Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills</p>	<ul style="list-style-type: none"> <li>• Having access to the right types of local facilities is an important part of community infrastructure. Colocation is a good way to achieve this. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> <li>• Availability, affordability, variety, location, standard and density are key social/health determinant themes when considering healthy lifestyles. As such it is recommended that housing related policies/delivery plans should reflect the above factors.</li> </ul>
<p>What impact will the proposal have on the social environment?</p> <p>Social status Employment (paid or unpaid) and worklessness Social/family support Stress Income and child poverty</p>	<ul style="list-style-type: none"> <li>• Careful consideration must be given to housing density as this can potentially have an impact on stress.</li> <li>• New developments must enhance the employment and educational prospects of local residents either through increased local provision or alternatively accessed via effective public or green transport.</li> </ul>
<p>What impact will the proposal have on the physical environment?</p> <p>Living conditions Working conditions Pollution or climate change</p>	<ul style="list-style-type: none"> <li>• New housing should be affordable, ie for families on restricted budgets and/or first time buyers. Positive impacts will result from quality/affordable housing as improving living conditions improves mental/physical health which promotes improved chances of employment, reduces stress and should decrease child poverty as families increase their income.</li> </ul>

<p>Accidental injuries or public safety Transmission of infectious disease</p>	<ul style="list-style-type: none"> <li>Increased targeted investment will have positive impacts on living conditions through properly designed locations. However, rising population numbers can lead to increased pressure on infrastructure facilities.</li> <li>Housing density is considered a key strand impacting on the physical environment, notably living conditions.</li> <li>Both on and off site infrastructure plans must account for the impact on existing and proposed residents/communities, taking measures to mitigate potentially negative impacts on living conditions, working conditions, pollution and accidental injuries/public safety. New infrastructure must take account of the risk of flash flooding and provide clean water to new developments, whether residential or commercial, to ensure we avoid problems such as pollution or infectious disease.</li> </ul>
<p>How will the proposal impact on access to and quality of services? Health care Transport Social services Housing services Education Leisure</p>	<ul style="list-style-type: none"> <li>Growth must be considered in line with the provision of health care, social services, education and leisure etc, ie are there adequate local services and can these cope with the increased pressure/demand arising from population increases? It should be a prerequisite that locality growth takes account of such future demands on local services.</li> <li>Greater investment and considered development into chosen localities will, in turn, bring associated health benefits if aligned to the ethos of local provision.</li> <li>Consideration must be given to the ability of existing green corridor infrastructures to cope with increased demand and whether they require additional investment/expansion.</li> </ul>

### Policy C3 – Land between Heatherleigh and Moss Land, Farington

<p>(The word proposal is used below as shorthand for any policy, procedure, strategy or proposal that might be assessed.)</p>	<p>What positive and negative impacts do you think there may be? Are there any impacts about which you feel uncertain? Which groups will be affected by these impacts?</p>
<p>What impact will the proposal have on lifestyles? Diet and nutrition Exercise and physical activity Substance use: tobacco, alcohol or drugs Risk taking behaviour Education and lifelong learning or skills</p>	<ul style="list-style-type: none"> <li>Having access to the right types of local facilities is an important part of community infrastructure. Colocation is a good way to achieve this. Improving access to local health services is identified as a priority in the South Ribble 2012 Health Profile produced by the English Public Health Observatories.</li> <li>Availability, affordability, variety, location, standard and density are key social/health determinant themes when considering healthy lifestyles. As such it is recommended that housing related policies/delivery plans should reflect the above factors.</li> </ul>
<p>What impact will the proposal have on the social environment?
