<b>Telephone:</b>	[REDACTED]
<b>Email:</b>	[REDACTED]

This Consultation will end on 28<sup>th</sup> November 2013

### Your Comments:

First of all the public meeting at the Centre. This, Samlesbury was a huge disappointment, left with feeling that BAE and Gatecoper have been going forward appears to be a cheap, short-term option, prepared with little regard for the locals living near to it. As a big international company with other Co's joining them on site is coming out for a big financial looking solution - a road direct to the Swallow roundabout. A677 entrance - LCC and Police rejected out of hand last time - too dangerous. What has changed since then - effect of 11/6's and demolishing. Therefore more A677 traffic than ever before numerous accidents, much more likely to happen today.

Branch Road - bypass built to reduce traffic and improve safety. The current no extreme has 1. increased traffic, 2. houses being obstructed/damaged by heavy vehicles 3. speeding traffic at start/end of dig for water works, 4 road about at bottom of Branch Rd damaged road to A59 towards Swallow roundabout, traffic grounds to left of to tree. New roundabout entrance to village will increase through traffic. Village needs:- 1. roundabout to remain - to remain would increase road accidents, 2. need a weight restriction on vehicles going through the village, 3. Don't need traffic calming ~~except~~ <sup>ramps</sup> - houses get obstructed with it 4. Speed cameras on long straight part of Branch Rd. 5. need traffic lights at top of Branch Road to help vehicles get onto main road. 6. A reduced speed limit of 20 mph should be introduced. The new plan takes no account of the existing house building plan by the Govt in the fields on one side of Branch Rd. Please look at the bigger former looking plan and build a direct access Swallow roundabout.

**Your Comments:**

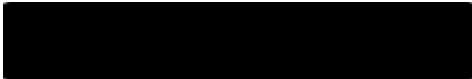

<p>Firstly the A59 should be a 30mph limit this is a road were they think they are still on the motorway. I have been along this road when there has been radar I know 2 miles before I get there. Getting out on the road from this place is a no go area. when BAE are starting and finishing. The accidents on this stretch of road, and there has been some, are mostly caused through speed.</p> <p>Everyone who comes to our house comments on what a bad road it is to get in or out. It will never be any different until the change the speed to 30m.p.h. at the BAE Traffic lights</p>

Ode to the planners (A677/A59)

We live between two busy roads  
That people know very well,  
For heavy traffic and fatal crashes,  
Sad stories we can tell.  
Please 'think long term' before you go  
And pass the plans you've made,  
Will your new junctions and traffic lights  
Meet the safety grade?  
You have the land,  
So please sort out  
A new route that is good,  
For people travelling to work  
And for the neighbourhood.

ps the residents on the Ribble Valley side of Branch Road, have only just received notice of your forthcoming meeting, thus making it impossible for them to reply by letter before the 15th December.

Mrs Janet Hindle
