Subject: RE: traffic count data
Importance: High

Ray

Traffic levels are NOT back to pre-covid. The attached example is at the Tank roundabout. We are not accepting traffic data collected today without any pre covid factoring. Factoring needs to consider suppressed growth.

Note: most LCC office staff are still working from home which is a good network proxy, how can background levels be considered normal.

I know current resi trip rates are higher in the AM as parents are taking children to school or making other short trips then returning to home to work.

There are too many uncertainties at the moment. I will be discussing PT with Ashley to understand what has happened between pre covid and now, county wide

You might want to highlight this position to all team managers. **I will be reviewing the position after the summer holidays.**
